Dear MAAX Sales Representatives,

Please see below information updates for MAAX Pearl, Collection and Storage Solution product lines.

MAAX Pearl Product Update:

Through listening to our customers we have made the following changes when ordering MAAX Pearl Designer Series baths and the MAAX Pearl Apoge shower.

Effective immediately, all trim hardware will be color matched to the standard acrylic Designer Series tub colors (white, bone and biscuit). All other non-standard colors will automatically come with chrome trim unless otherwise noted. For example, if a customer orders a Designer Series white tub the trim will automatically be white.

For the Pearl Apoge the shower plumbing trim components are only available in chrome, brass or satin nickel. The base (whirlpool) of the Apoge shower will automatically come color matched to the unit color unless otherwise noted.

MAAX Collection Product Update:

Effective immediately we will be adding specification (cut-out) templates to all MAAX Collection Living bathtubs.

MAAX Storage Solution Update:

Due to a change in vendors for the wood modules and trim kits for our Medicine Cabinets and Storage Solutions, we have taken the opportunity to review our offer, particularly our color finishes. Based on sales we will be discontinuing the Cherry and Maples finishes.

Please see the detailed list below for the storage modules that will be discontinued as the skus are depleted.

124137-921-154	Linen Cabinet – Cherry/Satin Finish
124137-921-156	Linen Cabinet – White Maple/Satin Finish
124136-921-154	Linen Cabinet – Cherry/Satin Finish
